### *Out with the old, in with the New!*

As 2016 begins, so do home renovations. The busy holiday season has passed and the coming months of winter have home owners thinking of indoor projects to increase the comfort and value of their home.

Kitchen and bathroom home renovations provide the highest return on investment.

Dynasty Bathrooms, as *Your Local Renovation Destination*, is there to help you get started!

**Design - Supply - Install!**

Whether you are a Do-It-Yourselfer or looking for a professional installation, our showroom should be your first stop. Our knowledgeable design consultants can guide you through the options to fit your space and your budget.

From ceiling to floor and everything in-between, our showroom at 369 Logan Avenue offers thousands of items on display including: tile, lighting, flooring, vanities, sinks, countertops, faucets, fixtures, toilets, showers, bathtubs, accessories and more! Many options and many brands to suit your style.

*The 2016 KBIS (Kitchen and Bath Innovation Show) showcased some fabulous new products that our Design Consultants can incorporate into your upcoming renovation. Stay updated on the new and trending products available by searching us online:*

# KBIS 2016

## Congratulations!

## Renovation of the Year Award!

**Congratulations** to Dynasty Bathrooms and its installers Joel and Steve for winning **GOLD** for Bathroom Renovations in the Manitoba Home Builders' Association 2015 RenoMark Awards.

This renovation consisted of a tub to shower conversion. An outdated tiled partition wall was removed and replaced with cultured marble shower panels and clear glass shower doors which reduced the visual barrier and gave the room an airy and open feel. From the water damaged ceiling to removal of plaster walls and the replacement of outdated tile flooring, this room was rejuvenated.

*A stunning transformation!!*

## NEW in Bathroom Shower Walls:

Kohler and MAAX have recently launched new shower wall options that can give you the look of tiled walls in a full size panel that offers:

- Quick & Easy Installation
- Designer-like Colours, Patterns & Textures
- Low-cost Alternative (vs tiling)

Kohler's Choreograph uses a joint system that fits standard showers, and can easily accommodate custom spaces. The walls are manufactured from **Serica™** - a proprietary composite material designed to be durable with a matte finish that suits any décor. The accompanying accessory line allows you to customize for your needs, including shelves, hooks, shower lockers and seating.

On Display  
in our  
Showroom!

MAAX's Utile offers one-piece wall panels with a direct-to-stud installation that align perfectly with an easy Ulok system. The panels provide realistic looking grout lines and tile texture for years of durability and elegance with minimal maintenance.

**WOW!!!**

Dynasty  
Bathrooms

and the

Ronald McDonald  
House

won the

**WOW Award!**

for

Best in Show

## *Let's get Inspired!*

So you have decided to renovate!

This can mean different things to different people whether it is just a particular area, such as the tub/shower area or vanity, or the whole bathroom. Either way, deciding where to start and coordinating pieces together can be challenging.

Try to tackle it simply.

Start by looking around you for inspiration, colours and ideas that interest and excite you. The internet can be a great source of ideas. Dynasty Bathrooms has some great resources to help:

- [www.pinterest.com/dynastybath](http://www.pinterest.com/dynastybath)
- [www.facebook.com/DynastyBathrooms](http://www.facebook.com/DynastyBathrooms)
- [www.houzz.com/dynasty-bath](http://www.houzz.com/dynasty-bath)
- [www.dynastybath.com](http://www.dynastybath.com)

And of course our Showroom at 369 Logan Avenue.

Use this time to pick things that attract you, intrigue you or determine what you down-right hate and do not want. This is all part of the process, don't worry about matching or contrasting yet, this part is organic and can be changed. Compiling a series of images, colors and textures will help narrow down what type of motif, tone and atmosphere you are trying to create.

"I like to use paint chips to create a pallet and then decide what will be which color." says Dynasty's Design Consultant Amanda Nicholls.

If you have selected something that you are very intrigued by (a stone, tile or a vanity or faucet), use that as your focal point and design around that piece when choosing color and tones.

*Our Client below liked the hue of teal, we used this as the accent color, incorporating a colored Kohler sink as the main focal point.*

*We created a transitional space by combining classic fixtures with the hard clean lines of the sink and vanity. The floor, vanity and sink were married together using one hue in different combinations. In contrast is the brilliant white toilet and the acrylic shower with glass doors.*
