

## **Care and Maintenance of Sprayed Granite and Cultured Marble Tops and Surrounds**

### **Everyday Cleaning:**

Use a soft cloth with gentle soap and water. DO NOT use abrasive cleansers (such as Vim or Comet)

### **Regular Care:**

Polish using regular household wax such as Gel Gloss. Regular care and polishing will improve the surface appearance and protect it.

### **Excessive Stains:**

For tough stains, try letting them soak in peroxide overnight. A combination of water, vinegar, ammonia and baking soda will also help combat stains. Stubborn stains can be removed with a product such as Bon Ami or 600-grit wet sandpaper. Buff the area with an automotive rubbing compound after sanding- toothpaste can also be used.

### **Surface Scratches:**

Remove using an automotive rubbing compound and a low-speed buffer.
