

### **Hydro Massage System:**

The Hydro Massage System includes: a hydro pump with an in-line water heater, eco-friendly ozone sterilization system, hydro massage intensity dial control, and strategically positioned hydro jet system for targeted and effective massaging.

The in-line water heater helps maintain the water temperature at constant level while bathing. Our ozone sterilization system is the most eco-friendly, chemical free disinfectant that can eliminate a wide variety of inorganic, organic, and microbiological bacteria.

### **Independent Hydro Foot Massage System:**

The Hydro + Independent Foot Massage package uses two independently run pumps to give bathers a simultaneous full body and foot massage. Or, bathers can enjoy an independent foot massage within minutes of simply filling the foot well up the seat level. The foot massage system includes a hydro pump with an in-line water heater. Both the strategically positioned upper and lower jets powered by two hydro pumps have an intensity dial air control to adjust the strength of the water pressure to your liking from a gentle pressure to a more rigorous massage.

Please note: if you choose the Hydrotherapy + Independent Foot Massage package, your walk-in bathtub will come with one (1) in-line water heater that will be connected to the lower jets and used with the independent foot massage feature, and an ozone sterilization system connected to the upper jets.

### **Air Jet Massage System**

The Air Jet Massage System includes an air pump with a 3-speed variable push control, strategically positioned air jets for optimal therapeutic relief, and an auto-purge feature that engages automatically 20 minutes after the pump has been turned off to purge the water from the air lines. to maintain an air system free of any build ups.

Note: This massage is more gentle than a Hydrotherapy Massage.
